we wrote this book to equip our students as well as practitioners many of whom are our former students with the current knowledge used to value companies parts of companies and the securities issued by companies our goal is to provide current conceptual and theoretical valuation frameworks and translate those frameworks into practical approaches for valuing companies we present the research and descriptive data underpinning these frameworks and use detailed examples to demonstrate how to implement them often using data from real companies corporate valuation theory evidence practice has been the industry standard on valuation for over two decades well before it was widely available the corporate valuation course based on this book is one of the few unstated requirements for graduates of the wharton school that hope to enter into the field of finance having hired dozens of wharton alumni who have learned valuation from this book i cannot imagine a more thorough guide or a better reference to learn valuation ben frost partner managing director goldman sachs consumer retail and mergers department target audience corporate valuation theory evidence practice is intended as a college textbook for both graduate and undergraduate courses in valuation given the detailed approach it is also a useful book for practicing professionals we have been using this material in both valuation based finance and accounting m b a classes at chicago booth and wharton as well as in undergraduate finance classes at wharton for many years although primarily serving as a text in courses that teach valuation the book can also serve as a background book for case based courses that include cases on valuation leveraged buyouts and mergers and acquisitions the book can also be used as a field guide for those who engage in valuation work we know that many of our former students refer to our writings in their work involving valuation and security analysis for years after they graduate from our respective institutions

seminar paper from the year 2007 in the subject business economics economic policy grade 2.0 university of bonn betriebswirtschaftliche abteilung i der staatswissenschaftlichen fakultät  
course seminar zur ausschüttungspolitik language english abstract in 1961 miller and modigliani abbreviated mm contrived that the distribution policy of a company is under certain circumstances not able to influence its share value i.e. that the dividend policy is irrelevant as long as a company distributes the full present value of its cash flow it is not relevant how or in which period it does this in detail linda and harry deangelo d d on the other hand found that miller and modigliani were wrong they say that the model of mm is unnecessarily restrictive in such a way that it even produces false and warped results after relaxing some assumptions of mms model they get a contrary result in their opinion payout policy is not irrelevant they say that when retention is allowed it is very well important and relevant which dividend policy a company chooses both points of view got a certain amount of support in the aftermath of their publishing prominent authors supporting mm were for example joseph stiglitz and mark rubinstein while myron gordon and james walter argued against it but which is the right position is it after all possible to answer this with certainty probably not maybe it will last years to get a definite answer if there will ever be one none the less this term paper will try to get some clarity onto that matter therefore the expose will start in chapter 2 with a review of miller and modigliani's proof of irrelevancy after this in chapter 3 there will be a presentation of the contrasting

thesis most recently emphasized by deangelo and deangelo who relax the critical assumption of no retention in chapter 4 there will be a discussion of the consequences for the market participants if retention is allowed brought forward along
